

Important information

Flying back to Hong Kong from 1st April 2022

On the 21st March, the Hong Kong Government announced that the flight restrictions currently in place will be lifted. Below is a summary of the latest requirements for passengers arriving in Hong Kong on or after the 1st April, 2022.

Prior to departure, all passengers must:

- Be a Hong Kong resident
- Be fully vaccinated (currently, this means 2 doses with the second dose taken no later than 2 weeks before the departure date). The vaccination record must be recognised by the Hong Kong Government.
- Present a negative PCR-based nucleic acid test taken within 48 hours of the departure time of the flight flying directly to Hong Kong
- Present proof of the PCR test laboratory to show it is ISO 15189 accredited
- Present confirmation of a booking for at least 7 nights at a designated quarantine hotel

All passengers are still required to complete a health declaration form and present the QR code proving the form has been completed upon arrival in Hong Kong.

Frequently Asked Questions

Q. What does *fully vaccinated* mean?

A. Currently, this means two doses with the second dose taken at least 14 days prior to arrival at Hong Kong.

For inbound travellers aged 12 to 17 (on the scheduled day of arrival), they may be deemed to have completed the Covid-19 vaccination after receiving one dose of Comirnaty vaccine.

For those who have been previously infected with Covid-19, one dose of vaccine is deemed to have completed the Covid-19 vaccination.

Q. Does the Hong Kong Government require people aged 18 and under to receive the third dose of the vaccination after the 31st May?

A. The third dose of the vaccination after the 31st May is for the vaccine pass only. As of the latest rule, those aged under 18 who are deemed fully vaccinated as per above rule are allowed to enter Hong Kong. They will have to complete the subsequent vaccination in Hong Kong in order to enter various 599f scheduled premises.

Frequently Asked Questions

Q. Are people who have recovered from Covid-19 considered exempt from vaccination requirements?

A. To be considered as fully vaccinated to enter Hong Kong, only one dose of vaccine is required for those who have been previously infected with Covid-19.

However, this is not the same as a vaccine pass.

Q. How can students in the UK who have not had Covid-19 arrange to receive their third dose of the vaccination?

A. Currently, only students aged 16 years old and over or at-risk children aged 12 to 15 years old are able to book a booster shot three months after the second shot. The third dose can be booked online, by calling 119, or visiting a walk-in clinic.
